

Ak-Sai Glasier

Hello,

Aksaei glacier region is very technical and well known for educating in various different levels and also suitable to train and operate mixed climbing.

For sure, we would go back to this area for climbing and we highly recommend our friends to do so.

The service of the club was extra perfect, only one matter that we were not able to charge our batteries and cellphone. The cook was excellent and our instructor was a very clever, strong and technical person.

Information of the route (omid93):

6 pitches (rope)

First pitch: Due to the heavy snow in the area, we climbed it with quick belay-almost 20 meters

Second pitch: 2 ice screw_ ice length almost 35 meter_ ice screw anchor

Third pitch: crystal ice_ almost 40 meters_ ice screw anchor

Forth pitch: Crystal ice_ a little bit swept to the right- almost 45 meters- ice screw anchor

Fifth pitch: almost 30 meters, Traverse to the right on the rocky ridge. Nots were ice screw and climbing Nots in rocky pitch_ Ice screw anchor

Sixth pitch: Last pitch was 15 meter of Crystal ice, at the end it was covered by snow. Anchor was on the summit with two T snow anchor (two axes) 43 meters
